## Eight Easy Ways to Control Sediment and Save Money on Construction Sites

Want to know one of the best ways to save money on a construction site? Don't get fined.

Fines for not complying with state and federal regulations are unnecessary costs that reduce profits and can put you out of business. The good news is, fines can be avoided just by ... [CLICK TO KEEP READING](#)

## Keeping Compliant with Work Site Postings

Permit compliance requires that Storm Water Pollution Prevention Plan (SWPPP) postings are readily available and easily visible on every construction site. Be sure to place your site postings outside, in areas where they can be located quickly and read without difficulty.

Remember to include your Notice of Intent and contact information in the postings, as well as a brief description of the work being done and any additional information required by local regulators. Laminate all of your postings to protect them from the weather, and keep a copy of each document so that it can be replaced quickly should it become faded or worn. Being mindful of your SWPPP postings is one of the easiest ways you can stay regulation-compliant and fine-free.

## Dandy Facts

1. Cheetahs are the fastest known animals on land, with running speeds that can top 75 miles per hour. They can accelerate from a standing position to 60 miles per hour in just three seconds.
2. When you sleep overnight in a reclined position, you grow by about 8mm (0.3 inches). The next day as you stand, walk and sit, however, the force of gravity squeezes your cartilage discs and you shrink back to your former height.
3. There is enough fuel in a full tank of a jumbo jet to drive an average car around the world four times.
4. Sound travels about four times faster in water than in air.
5. Al Gore and Tommy Lee Jones were roommates at Harvard.
